

# ABOUT AGROMAX

Agromax is a leading producer of custom aggregates and a distributor of fertilizers, chemicals, grass seed, and accessories for the golf course, sports field, landscape, and horticulture industries.

Production locations along the U.S. Gulf Coast enable efficient domestic and international distribution.

Our primary goal is to provide quality products and services that contribute to the overall success of our customers.

## COMMITTED TO QUALITY

Member of Alabama Turfgrass Association, Gulf Coast Golf Course Superintendents Association, Louisiana Mississippi Golf Course Superintendents Association, Gulf States Superintendents Association

## QUALITY AGGREGATES

custom products for the golf, sports field, landscape, & horticulture industries

# Custom Aggregates

## Superior Sands. Economical Pricing.

### TOPDRESSING SAND

Agromax produces topdressing sands to exceed USGA recommendations. Our topdressing sands can also be dyed, dried, and custom-blended with amendments and fertilizer.

- J.M. Taylor-Made – medium or coarse
- Whitecap
- Champion Select – meets Champion Dwarf Bermudagrass™ recommendations
- Greenspeed – dyed/dried, available with J.M. Taylor Made or Champion Select

### BUNKER SAND

Agromax bunker sands deliver remarkable playability without sacrificing stability on the bunker face or infiltration rate. Particle size, distribution and shape are the driving forces behind the performance of our bunker sands. Bunker sands can be produced to customer specifications.

- Classic White (very white)
- Great White (brilliant white)

### TEE & DIVOT MIX

We offer multiple tee and divot mix blends to accommodate the customer's application and budget. Blends are available dried, and upon request, can be custom-blended with amendments, fertilizer, and seed.

- Green Divot Mix – dyed/dried for color coordination with turf and color retention
- Sand/Soil, Sand/Peat, and Sand/Soil/Peat Mixes – stock blended ratios or custom-blended; dyed and dried or moist.

### ROOT ZONE MIX

Precision Blend root zone mixes are produced exactly to project specifications and certified-lab tested throughout the entire production process. Common amendments include: sphagnum peat, reed sedge peat, zeolite, and Profile™.

### PEA GRAVEL

Our pea gravel is sized to USGA green construction recommendations. When layered with our Precision Blend Root Zone Mix, all USGA physical property parameters and particle size recommendations are met for a USGA-constructed golf green, without the need or additional expense of an intermediate layer. Gravel is washed to remove all sand, silt, and clay, and sized for bridging, permeability, and uniformity.

## Additional Products

### Fertilizers

- Greens, Tees, and Fairway Grade
- Landscape & Ornamental
- Soil Conditioners
- Foliar & Soluble
- Micronutrients

### Bermuda Sod

- Tifway 419
- TifSport
- TifDwarf
- TifEagle

### Miscellaneous

- Erosion Control
- Plant Growth Regulators
- Aquatic Chemistries
- JRM tines, Bedknives, & Blades
- Sandstor Silo™

### Pesticides

- Fungicides
- Herbicides
- Insecticides
- Nematocides

### Surfactants & Adjuvants

- Spray Indicators
- Foam Markers
- Spreaders/Stickers
- Defoamer
- Tank Cleaner
- Wetting Agents
